p-value: * <0.05 ** <0.01 *** <0.001)

Full models adjusted for:

School building area (sq ft), total FTE teachers, total student enrollment, Black/Native American/Asian/Hispanic student enrollment (%);
Neighborhood population density, median household income, Gini index, unemployment, Democrat-to-Republican ratio, crime index

Reduced models adjusted for a subset of the above covariates using forward-stepwise selection with 0.10 significance level for addition to the model
